

Junior Developer Professional Skills Document

David Moreira
1998

EXPERIENCE SUMMARY

My experience so far comes from school, internships, and online courses, I've concluded my high school graduation in Programming and Management of Informatic Equipment where I learned how to manage hardware and software of computers as well as programming. I've learned some about Linux and Windows there as well, that was the course that introduce me to the world of programming.

Right now, I'm doing an internship to conclude my college degree in Mobile Applications at IPCA. To the moment, I've done some projects myself and with friends/colleagues, and I have a few in mind too for the future, such as mobile app's and websites mostly.

My recent project was in Kotlin using Android Studio, Javascript using Visual Studio all of it complementing with Firebase.

I enjoy programming, but I enjoy more discovering and learning new languages.

TECHNICAL ABILITIES

1- Beginner Academic, training only | **2 - Intermediate** Level 1 + small projects or internships **3- Advanced** Level 1/2 + project experience | **4 – Professional** Level 1/2/3 + wide professional experience
5 - Expert

PROGRAMMING		
LANGUAGE	LEVEL	VERSIONS
Java	3	all
C#	1	all
JavaScript	3	all

PROJECTS

Bank Application– CodingHive – Developer

September 2018 to February 2019

Context

Project with emphasis in a bank application in C, we would need to build a database, an authentication and a reserved space for every individual and job to that bank such as administrator, clients, account manager and marketing manager. Also used SCRUM and Trello and made a poster to sell our product.

Main Activities

Analysis planning
Programming in C
Testing

Technologies

C;

Football Tournament Manager (League Hub) – ServingCode – Developer

2019 to February 2020

Context

Project with emphasis on a Mobile App with authentication, managing tournaments, schedule games, show players, insert players, teams and so on. Mobile Development in Kotlin, with a Backend in Nodejs on the framework of Expressjs and Backoffice website for administrator in Php. Also used Figma and Photoshop to make the design and some icons and logos.

Main Activities

Analysis and database architecture planning
Web and Mobile Development
Testing

Technologies

Kotlin;Nodejs;ExpressJs;Php;
MySQL;Photoshop;Illustrator;Figma;

HealthScheduler – HyperCodeum – Developer

2020 to February 2021

Context

Project with emphasis in mobile development we built an APP with authentication for patients of an reserved area on the Hospital de Gaia/Espinho with Amyotrophic Lateral Sclerosis (ALS) using Kotlin where they could talk to a doctor and watch their appointments, we also built an Website for the doctors and nurses with authentication that communicates via chat with their patients, schedule their appointments and also a group chat with another doctors to talk about a patient, we also a reserved part for administrators The design was all made by us on Figma.

Main Activities

Analysis and database architecture planning
Web and Mobile Development
Testing and production support and maintenance

Technologies

Javascript;CSS;jQuery;HTML
Kotlin;Firebase;Figma;

Restaurant APP– PAP– Developer

2018

Context

In this project I wanted to put to the test my learning skills and some knowledge I got in my first internship on DigitoSolutions, I basically tried to learn Java and SQLite by myself, and using some WordPress and MariaDB knowledge I acquire on the internship, I start building my App for a restaurant with that main reason and also to be evaluated. The app consisted in schedule a day and a table at the restaurant, being the table automatically chosen for you, you could also watch the menu, some authentication, costumers reviews. The Website purpose was for people to download the app if they got to the website first, with also the menus, location, a full review of restaurant and few more things.

Main Activities

Analysis and architecture planning
Web and Mobile Development
Testing

Technologies

WordPress;Java;SQLite;MariaDB on Linux;

LANGUAGES

A1/A2 Basic user; | **B1/B2** Independent user; | **C1/C2** advanced user

	UNDERSTANDING	SPEAKING	WRITING
English	C1	C1	C1
French	A1	A1	A1
Spanish	A1	A1	A1

EDUCATION

2021	Internship on InflightIT
2021(March)	Koa.js online course and Angular Course
2019 (October)	Android Training Academy (Google Workshop)
2018 (March)	Bunch of online courses about marketing and SEO
2018	Finished Highschool (Average:16)
2018	Internship on DigitoSolutions
